Anudaan - Making Transplants Affordable - An Initiative by MOHAN Foundation

Pallavi Kumar, Jaya Jairam
MOHAN Foundation, India

“Anudaan - Making Transplants Affordable” is an initiative launched by MOHAN Foundation in the year 2021 as a mark of its journey towards saving lives for the last 25 years. This initiative aims to provide financial assistance to the economically underprivileged, thus enable access to life-saving transplants. Most transplants take place in the private sector and the prohibitive costs makes them inaccessible to the poor. Since hardly any government hospitals perform transplants, affordable transplants remain elusive to the poor. Anudaan has been providing partial contribution to the transplant cost of individuals and has been working with hospitals to bring down the transplant costs.

It is being supported by philanthropic individuals and corporate houses such as Century Plyboards India Limited, Edelweiss Tokio Life Insurance, Ethos Watch Boutiques and BNP Paribas. MOHAN Foundation also partners with likeminded organisations such as THPF (Transplants Help the Poor Foundation), TANKER Foundation and MFJCF to name a few to share the transplant costs. We have also been raising funds on Milaap, our Crowdfunding partner. This quarter we were able to support the transplant of six individuals, many of them being children under the age of 10 years. Anudaan aims to touch the lives of these individuals and help them achieve their aspirations.

adani
Foundation

Adani Electricity Mumbai Limited (AEML) and Adani Foundation have joined hands with MOHAN Foundation's 'Anudaan - Making Transplants Affordable' for extending part support to patients battling organ failure and unable to afford transplants. We hope to reach out to more underprivileged patients, specially children, with this support.

An initiative touching lives...
